## What happens in a Presentation?

Over the past 12 years, I have presented my work in lecture demonstration form and as sample classes to groups of Acupuncture Students, Electrologists, Dance teachers, at Pilates Conferences, for school children and in higher education settings among others.

These are fun, creative and lively presentations that compliment more cognitive, academic gatherings to keep your audiences awake and engaged throughout the day or weekend.

I am available to present a general overview of the Feldenkrais Method® or of Laban/Bartenieff Movement Analysis, as well as custom designed presentations for special interest groups such as cyclists, gymnasts, salsa dancers, golfers, teachers, musicians, etc.

*If you would like to inquire about these presentations, please include the name and interests of your group, where you are and the dates you are considering.*
